

What's new in Field Manager PRO 2010

Reports

- View these reports in a grid format, sort columns and export to an Excel spreadsheet:
 - Crop Rotation Report
 - Equipment Usage Report
 - Input Usage Report
 - Inventory Report
 - Irrigation Report
 - Labour Usage Report
 - Precipitation Report
 - Sales Report
 - Storage Treatment Report
- A Lot # History Report is included.
- There are new *Small Fruit Producer* CanadaGAP forms.
- Existing *Potato Producer and Packer*, *Leafy Vegetable* and *Cruciferae Producer* forms are updated.

Lot #	Type	Date	Amount	Unit
1234	Harvest	08/10/2010	87.500	tonne
1234	Harvest	09/10/2010	87.500	tonne
1234	Harvest	10/10/2010	75.000	tonne
4567	Harvest	07/10/2010	25.500	tonne
4567	Harvest	11/10/2010	29.750	tonne
4567	Harvest	12/10/2010	29.750	tonne

Setup

- If you're an organic grower, you can choose inputs from a built-in list of organic pesticides and fertilizers. Go to **Setup > Software Preferences > Operation/Observation Settings** and check "I am an organic grower."

Records

- Track inventory lot numbers throughout the warehouse from harvest to sale. You can subcategorize inventory within your storage location.
- In irrigation records, you can enter combinations of data such as inches/acre, inches/hour, litres/acre and litres/hour.
- Access the quick search tool from any pick list in the software.
- Add a new buyer on the fly while entering a sale.

Main screen

- Filter the land tree to see all fields that grew a specific crop without having to specify the variety.
- Switch to any crop year in a single step. Click the drop-down list to choose the year you'd like to work in.

Tools

- Synchronizing with the mobile device is simpler.
- After you synchronize, you'll get a confirmation report of how many records have been updated, deleted and inserted on your computer.

Other changes

- You can show and hide operation types. For example, you can choose to hide irrigation.
- The Backup, Rebuild and Restore tools are on the File menu.
